Profile

I'm a mission-driven, multi-certified Software Engineer with years of experience assembling complex integrations and solutions. I specialize in Python, Algorithms, and Data Structures, and have experience with Java, SQL, JavaScript, APIs, and the full stack! I'm a lifelong learner and a lover of new technologies who is passionate about how tech can solve some of the world's most pressing issues!

Work experience

08/2017 — 05/2021   REMOTE, UNITED STATES
Technical Consultant
Techfino LLC
- Developed custom software and functional solutions for a multinational retail corporation in the top 100 of the Fortune 500 list
- Devised and implemented ERP system integrations and customizations with highly detailed design documentation, Requirements Analysis, Test Driven Development, Git Workflow, and Agile Delivery through and after Go-Live for an industry-leading enterprise
- Successfully completed more than 7 projects, 2 of which as the technical lead, resulting in the repeated recognition & praise of clients and business owners
- Designed and implemented technical specs for the client's expansion into a new vertical market, resulting in increased revenue and a new customer base
- Optimized code to scale up a Wholesale SuiteApp, enabling multi location subsidiaries, resulting in the uptake of multiple new larger-scale clients.
- Interfaced directly with clients and 3rd party platforms for holistic technical integrations between NetSuite and platforms such as Onveos, Azure, Constant Contact, Mailchimp, DSCO, OzLink, Returnly, and Celigo's Integrator.io to meet complex product specifications
